

Kruise ATF

Automatic Transmission Fluid

Kruise ATF

Automatic Transmission Fluid

Product Description

KRUISE ATF is a special purpose heavy duty transmission fluid specifically designed for use in Automatic Transmissions, Power shift transmissions and power steering systems applications operating over a wide temperature range. KRUISE ATF is also suitable for use as a hydraulic and compressor oil for systems designed to use such fluids

Features and Benefits

- KRUISE ATF is formulated with special anti-wear additive package that controls wear of critically / heavily loaded transmission, compressor and hydraulic pump components thus prolonging the life of the equipment
- It has an excellent oxidation and thermal stability which controls the degradation of the lubricant under severe operating conditions of the equipment
- The high viscosity index base stocks formulation and excellent low temperature fluidity provides exceptional service over a wide temperature range. This makes the equipment available even at very extreme temperatures

- Reduced equipment downtime resulting from it's excellent rust and corrosion inhibitors which provide exceptional continuous protection to precision components of the equipment

Application

KRUISE ATF provides excellent service life in the following range of applications.

- Heavy duty automotive transmissions
- Power shift transmissions
- Power steering systems
- Industrial high pressure hydraulic systems
- Stationary air compressors (not for compressing breathing air)
- Rotary vane flood lubricated compressors
- Screw type air compressors
- Remote controlled hydraulic systems

Typical properties of KRUISE ATF

Pour point oC	-42
Viscosity, Brookfield mPa.s @ -40 oC	40,000
Kinematic viscosity mm ² /s @ 40 oC	35.5
Kinematic viscosity mm ² /s @ 100 oC	7.2
Viscosity index	172
Density at 20 Deg C	0.882 kg/L
Colour	Red

Performance standards

- Mercedes Benz sheet 236.1 and 236.5
- Allison C-4
- VoithG.605 transmissions
- ZF sheets

Health, Safety and Environment care

Avoid any contact with used oil. If oil is ingested, seek medical advice. Protect the environment by disposing used oil and empty containers in compliance with local regulations.
